

MISSION

The mission of the Washington Minority Business Coalition is to unite minority business organizations throughout Washington State in order to strengthen organizational capacity, expand economic opportunity, increase access to capital and procurement, promote supplier diversity, support entrepreneurship and business growth, and advocate for equitable public policies that advance the success of minority-owned businesses.

VISION

The Coalition envisions a Washington State where every minority-owned business has equitable access to education, technical assistance, financing, procurement opportunities, business networks, and sustainable growth — regardless of race, ethnicity, language, culture, geographic location, or industry sector.
